

FrontRow® Video Conference Cable Kit: Juno/Smart Receiver (ICR-01) Installation Guide

The Video Conference Cable Kit allows you to use a single USB connection from a computer to manage your device, operate Teacher Edition Capture/Control software, and transmit audio from the device over popular video conferencing solutions like Zoom®, Microsoft Teams®, Google Meet® and more.

1. Disconnect power from the unit
2. Connect the wire harness to the Juno or Smart Receiver (ICR-01) and connect the USB cable to the computer
3. Reconnect power to the unit
4. Conduct tests to the system using the Teacher and Student microphones, play audio from the computer, share audio over video conferencing

Additional Juno and Smart Receiver (ICR-01) installation guides, user guides and instructions for video conferencing can be found at <https://www.gofrontrow.com/resources/manuals-guides/>
